

Areas Commonly Treated with Botox

- Glabella (frown)
average dose 20-40 units

Before

After

- Forehead
average dose 6-12 units

Before

After

- Crow's feet
average dose 12-20 units

Before

After

Lower face areas:
Often combined with fillers for maximum benefit. Dosing is usually every 3-4 months indefinitely due to frequent usage of these muscles.

- Lip lines (smoker's or pucker lines)*
average dose 6-18 units

* Takes a little getting used to with whistling, sipping, saying "p's" and "b's". It's like having a new slight weakness in your hand: you can tell a difference but no one else can.

- DAO (grimace)
average dose 4-10 units
